Subject: **RSDI Income Entry for LTC Cases in CIS**

What RSDI income and Medicare B premium amounts should be entered in CIS when authorizing or performing maintenance on MA LTC cases?

Response By: **Division of Health Services**

Date:08/02/10

On 12/02/09, the CAOs were notified that display issues were occurring on DX Exchange 3 (Bendex). The CAOs were given specific steps to ensure the correct entry of both the RSDI income and the Medicare B premium. In MA LTC cases it is important to enter the correct amounts to ensure accurate billing of the individual's payment toward cost of care.

DX Exchange 3 will display with an individual's RSDI as follows:

Basic Information

Claim Acct #	Exchange Status	Data Receipt Date	Hit Receipt Date	Disability Date	Title II Gross Amt
	Hit Disposed	05/11/2010	05/12/2010		\$1,261.50

Status Title II SSI Part A and B RRB Source Demographics Disposition Management

Source	Disabled	COLA	Number of Claims	SSA Processing Date
D - Request originated from direct submission by state.		No	1	05/12/2010

Benefit	Status	Entitled	Terminated	Amount	Payer
Title II	CP	08/1995		\$1,165.00	
SSI					
Part A	E	08/1995			
Part B	Y	07/1996		96.5	SELF
RRB					

When the Bendex shows both the gross income and the Medicare B premium with a difference of 10 cents over the current standard of \$96.40, the CAO must decrease the income and Medicare B premium by 10 cents in CIS. In this example the CAO would enter income of \$1261.40 on the CAUNRD screen and

\$96.40 on a CAMEDX screen in CIS. See Q3343 for additional information on the display issues.

If a notice with incorrect income and Medicare B premiums has been issued, a corrected notice will need to be sent.
